Common drug - food interactions :

<http://www.eatright.org/resource/health/wellness/preventing-illness/common-food-drug-interactions>

Natural Black Licorice (Glycyrrhiza)

Glycyrrhiza — a natural ingredient used to make black licorice — can deplete the body of potassium while causing an increased retention of sodium. When the body is depleted of potassium, the activity of digoxin, a medication used to treat heart failure, can be greatly enhanced, resulting in the heart not beating properly.

Glycyrrhiza can also decrease the effectiveness of high blood pressure medicines. And people taking Warfarin should beware that glycyrrhiza can break down the drug, resulting in an increase in the body's clotting mechanism. Excessive amounts of natural licorice should be avoided when taking Digoxin, warfarin or blood pressure medications.

BP screening today

High blood pressure (HBP) is a common condition that can lead to heart disease and stroke. It is often called the 'silent killer' because it usually has no symptoms. However, it can be easily managed with lifestyle changes and medication. Regular blood pressure screening is essential for early detection and treatment.

Pharmacy week 2015 for staff :

- Please be familiar with info on posters!
 - Promote chronic medicine management ...
 - * ask - are you happy with your chronic meds?
 - * ask - do you know what /why you are taking?
 - * ask -has chronic med made your life better?
 - Can we phone you to prepare chronic meds monthly?
 - Encourage patients to bring in the box and ask what the medicine is for.
- Explain how to take meds correctly eg.
Simvastatin at night , anti-inflams with food

make an extra effort for this week please *

"Laughter is the best medicine"
A duck walks into a drugstore and says to the pharmacist, "Gimme a chap stick." The pharmacist asks the duck, "Will that be cash or charge?" The duck replies, "Just put it on my bill." The next day, the duck goes back to the drugstore and says to the clerk, "Give me a box of condoms." The clerk says, "Do you want me to also put them on your bill?" The duck says, "Hell no, I'm not that kind of duck!"

"Laughter is the best medicine"
A guy walks into a pharmacy to pick up his prescribed suppository and asks the pharmacist how to use it. The pharmacist tells him that he should take it rectally, and the guy leaves, confused. After 10 minutes, he comes back in and asks her again how to use the suppository. The pharmacist tells him to put it in his anus, and the guy still seems confused, but leaves anyway. After an hour, he calls the pharmacy and asks the pharmacist how to use the suppository again, and she tells him, "Grab the suppository and shove it up your ass!" The guy yells back at the pharmacist, "No need to be rude, you're just doing your job!"
